Subject: Microsoft Settlement

To whom it may concern,

I strongly encourage a fair and appropriate settlement concerning Microsoft and their anti-trust violations. The company in question has abused it's position and created an unfair market place to which they are the dominate player. In order to right this situation the government must truly punish Microsoft for their unethical behavior. This means creating opportunities for other companies that have suffered at the expense of Microsoft's business practices. Proposals such as the education solution only increases Microsoft's market share and shows that the current presidential administration is oblivious to the current problem. Microsoft is a monopoly and that is definitely not beneficial to the economy. In order to increase competition steps must be taken to thoroughly punish Microsoft and give businesses such as Apple Computer, Java, and a host of others a fair chance.

Thank you,

garrett williams
